

## Teachscape Details

DPI will coordinate the purchase of ALL Teachscape licenses for all state model districts. Districts do NOT need to contact Teachscape for additional or upgraded licenses.

DPI will PAY for all teachers to have an Educator Bundle, all principals and assistant principals (as reported on the 1202) to have an Evaluator Bundle, and all Superintendents to have a Superintendent Bundle within Teachscape. The ONLY costs districts might incur include those associated with purchasing more evaluator bundles than the number of principals and APs listed on the 1202.

If a district purchases more evaluator bundles than DPI will fund, DPI will still coordinate the process—districts will simply be sent an invoice from Teachscape for the additional costs.

All educators and their evaluators using the State Model must receive Teachscape licenses from the state—the 2013 Framework.

All teachers, principals, and their evaluators must use the state Teachscape platform (2013 Framework and state processes).

If a district wants access to the 2007 Framework Rubrics for other educator roles (e.g., counselors, nurses, etc.) must work directly with Teachscape to order those.
